

Mr Podium

Dear Mr Podium
How are we the same?
We both feel hot cold and anger
So let's move it up the chain
So love who do you love
And loss who do you mourn?
And can you imagine a world without you
The world when you're gone?

And when you tell a lie,
Do you know it's a lie?
And what are you telling yourself to make it right?
And would you tell that lie,
If it were just you and I
With no one watching?

Dear disbeliever,
Physics doesn't mind
If you, in ignorant bliss or wilfully complicit,
Dismiss rules that bind
By these rules
We put man on the moon
And by it's rules the earth warms or cools
Physics doesn't know dime.

And when you tell a lie,
Do you know it's a lie?
And what are you telling yourself to make it right?
And would you tell that lie,
If it were just you and I
With no one watching?

How are we the same?
We both feel hot cold and anger
So let's move it up the chain
So love who do you love
And loss who do you mourn?
And do you know there will be a world
When you are gone?

And when you tell a lie,
Do you know it's a lie?
And what are you telling yourself to make it right?
And would you tell that lie,
If it were just you and I
With no one watching?

With no one watching x3
